Volume 3 – July 20th, 2021

HDP Release Update

It has been one year since the HDP opened its doors to prioritized COVID applications and the last year has brought new datasets, updated tools and access to all applicants. With this release, comes an improved user experience within the secure platform and a published data refresh schedule.

A new introductory Splash Page has been added **within the secure platform**, which has an overview of the tools available and quick access to tutorials to help new users.

A new HDP Tutorials page has been added to the Splash Page within the secure platform, which includes 6 Tutorials to help new users navigate our tools. There are also quick links to the HDP and GitLab Shared Code repositories.

TUTORIALS

- Saving Files in the HDP
- Databricks
- Mauro
- Microsoft SQL Studio Server Management
- Python & Anaconda
- RStudio

HDP Data Sets Refresh Schedule

All HDP data sets have also now been updated and a regular refresh schedule is now published on the [HDP website](#). Click on the screenshot below to see the full HDP Available Data page and refresh schedule. This list can be searched and filtered by Data Set name, Scope or the Refresh Schedule.

The screenshot shows the 'HDP Available Data' page on the British Columbia Health Data Platform. The page includes a navigation menu on the left, a search bar, and a table of available data sets with their refresh schedules.

Data Set	Scope	Refresh
CDR - Chronic Disease Registry	Latest version	TBD
COVID Acute Admissions	Starting Jan 2020	Weekly
COVID ICU Admissions	Starting Jan 2020	Weekly
COVID test lab data	Individuals tested and their result, starting Jan 2020	Weekly
CR - Client Roster	Latest version	Monthly
