PRIME Project Update

October 1, 2018

The PRIME Project Team would like to thank everyone who participated in our engagement sessions. As a result of various engagements, the PRIME team has received and completed our assessment of the input and has made revisions to address this feedback.

The PRIME team is committed to providing a solution that meets regulatory and patient needs, but also the needs of those who must use it. As such, we have removed the Verifier role and it was agreed that we have made great strides in addressing the stakeholder concerns.

We also separated the broader sector IDAM work from the PRIME project, so that the project can concentrate on driving to the Dec 1, 2020 deployment date. The Digital Health Initiative will take on the broader IDAM strategy and roadmap. This was a significant point in the project that gives us a green light to finalize solution requirements and proceed to development, but we will continue to work with our stakeholders on the engagement front. We will leverage their knowledge to ensure we're engaging with the right people at the right time, and with the right message.

We have made a demonstration prototype available for stakeholders. For now, we advise that you must use the current version of Google Chrome for this prototype. This browser requirement only applies to the prototype and not the solution. We suggest reading the prototype's User Guide before proceeding to the Registration and Enrolment sections. The User Guide can be found on the prototype landing page. This prototype is currently in the early stages of development and has a planned schedule of improvements. It is not representative of the solution. We would appreciate for feedback to be provided at upcoming engagement sessions, within the scope of the functions being demonstrated. We look forward to using the prototype to improve the solution and suit the needs of everyone involved.

Remember, you are welcome to email us at any time with questions or concerns, at PRIME@gov.bc.ca. Thank you for your patience.
