

Criteria	Descriptor	Applicable Section in Funding Application	Maximum Rating Available	Evaluation Rating	Scoring Guide - Degree to which the Application clearly demonstrates, in a measurable fashion, that it meets the evaluation criteria		
			Total = 100		Up to 33% of maximum points available	34% – 66% of maximum points available	67% - 100% of maximum points available
A. Strategic Alignment							
Alignment with Government priorities / strategies	Supports Government provincial priorities / strategies in health care	Alignment with Priorities & Strategies	15		Application aligns somewhat with Government priorities	Application clearly and solidly aligns with one or more Government priorities	Application is essential to pursue one or more Government priorities / strategies
Alignment with the health authority/agency's operational priorities/strategies / plans	Supports the health authority/agency's operational priorities / strategies / plans in delivery of health care services	Alignment with Priorities & Strategies Monitoring and Evaluation	15		Application aligns somewhat with health authority/agency priorities	Application clearly and solidly aligns with one or more health authority/agency priorities	Application is essential to the ability to pursue one or more health authority/agency's priorities / strategies / plans
B. Sound, Efficient & Sustainable Health Care System Management							
Improves transparency and accountability in monitoring and evaluating value received for funding	Clear, accurate and complete information will be provided, monitored to evaluate the service and eliminate the risk overlapping payments for services from different sources	Monitoring and Evaluation	10		Application will improve accuracy, timeliness and completeness of information used to manage and evaluate the service	Application will improve accuracy, timeliness and completeness of information used to manage and evaluate the service and will eliminate the risk of overlapping payments from different sources	Application will result in demonstrable, quantifiable savings to the health care system through improved management
Demonstrates improved flexibility and efficiency in the utilization of health care system resources (Lean Management Principles)	Integrated/ team based approaches incorporating less expensive health professionals in the effective and efficient delivery of health care services	Expected Benefits	5		Demonstrates improved linkages that better integrate / co-ordinate the application of health care system resources	Demonstrates improved integrated / co-ordinated use of resources that will deliver substantive and quantifiable improvements service delivery	Demonstrates improved integrated / co-ordinated use of resources that will deliver substantive and quantifiable improvements service delivery with built in plans to further reallocate / adjust existing resources / funding for further service delivery improvements

Criteria	Descriptor	Applicable Section in Funding Application	Maximum Rating Available	Evaluation Rating	Scoring Guide - Degree to which the Application clearly demonstrates, in a measurable fashion, that it meets the evaluation criteria		
			Total = 100		Up to 33% of maximum points available	34% – 66% of maximum points available	67% - 100% of maximum points available
B. Sound, Efficient & Sustainable Health Care System Management (continued)							
Improved cost to government and health authority/agency for providing physician services	The net cost of services to Ministry/health authority/agency is reduced (absolute dollar amount and percentage increase)	Financial Cost Overview Proposed Services Proposed Costs	10		Significant increase in cost	Moderate increase in costs	Quantifiable savings are expected
C. Results Focused Health Care System Performance							
Improves access to medical services for patients	Measurable improvements in timeliness / availability of medical services for the patient population served	Expected Benefits	10		Sustains or minimally improves access to medical services	Moderately improves access to medical services	Significantly improves access to medical services
Improves effectiveness / quality of medical services for patients	Measurable improvements in patient outcomes	Expected Benefits	10		Minimally improves patient care/quality of services	Provides moderate improvements in health outcomes for patients	Provides significant improvements that address complex or specialized patient care (e.g. chronic)
Increases the quantity of medical services delivered to patients	Measurable increases in the number of patients receiving services to address increasing demand for services	Expected Benefits Monitoring and Evaluation	10		Maintains or minimally increases service volume	Moderately increases volume	Significantly increases service volume
D. Proponent Capacity							
Physician resource capacity required to successfully perform the proposed services	Proponent has access to a sufficient number of physicians and other health care providers with the necessary expertise/ experience to provide the proposed services	Proposed Services Proposed Costs Implementation	10		Proponent currently has access to minimum resources required (credentials and/or numbers) and recruiting will be a challenge	Proponent currently has access to sufficient resources with required (credentials and/or numbers) and/ or expects to obtain the necessary resources through recruitment / training	Proponent currently has access to all necessary physician resources (credentials and/or numbers) and does not need to rely upon further recruitment or training to provide the service.
Non-physicians resources required to successfully perform the proposed services	Proponent ability to provide all other non- physician resources required for the proposed services to be delivered as and when planned. (eg. staff / facilities / equipment / operating budget, etc.)	Implementation	5		Not in place but seeking approval for plans to commit the necessary resources	Government and health authority/agency have formally committed to provide all of the resources in the time frame required but have not yet implemented these plans	Government and health authority/agency currently have all of the resources required in place.

Note: Maximum potential score = 100 points. Recommended threshold score for new / increased APP funding commitments = 67%.
