1. BC Vaccine Relationship File (BC MIP to DIA-IA-BC PIN Mapping)

Subset Name	BC Vaccine Relationship File
Tab	BC_Vaccine_Relationship
Description	Brand specific Manufactured Immunizing Products (MIP) currently or recently available for prescribing and administration in BC with the precise ingredient, strength, dose form and relevant unit of presentation for use in Canada. Each product and associated metadata are categorized as “Detailed Immunizing Agent” (DIA) and “Immunizing Agent” (IA). MIP is a child of DIA and DIA is a child of IA.

Data Field	Description	Example
BC UNIQUE MIP CODE	Code used to uniquely identify the manufactured immunizing product.	02402904
BC UNIQUE MIP CODE SYSTEM	Code system associated with the unique identifier. Currently, only Health Canada drug products and SNOMED CT code systems are used.	Health Canada
HC DIN	Drug Identification Number issued by Health Canada that corresponds to the Manufactured Immunizing Product.	02402904
BC PIN (PHARMANET)	B.C internal unique Product Identification Number (PIN) used for publicly funded vaccine PharmaNet claims.	66128152
MIP PRODUCT NAME	Manufactured Immunizing Product name as listed by Health Canada.	Nimenrix

BC Vaccine Catalog Data Dictionary

Data Field	Description	Example
MIP SCT CODE	SNOMED CT code represents the manufactured product (real clinical drug).	21781000087106
MIP SCT FORMAL NAME	SNOMED CT fully specified name identifying the real clinical drug name of vaccines and passive immunizing agents with precise ingredients, strength, dose form and relevant unit of presentation.	NIMENRIX powder and diluent for solution for injection Pfizer Canada Inc. (product)
HC FORM	Health Canada (HC) available physical forms in which the vaccine is produced and dispensed (e.g., tablet, capsule, liquid, suspension). Options listed in the DPD are concatenated and separated by commas.	Kit, Powder for solution
HC ROUTE	Health Canada (HC) possible routes of administration for this vaccine. Options list in the DPD are concatenated and separated by commas.	Intramuscular
UNIT OF PRESENTATION CODE	SNOMED CT code representing the unit of presentation.	733026001
UNIT OF PRESENTATION NAME	The qualitative concept name that describes a countable entity in which the clinical drug is presented (e.g., tablet, capsule) or in which it is bound (vial, ampule).	Vial (unit of presentation)
DESCRIPTOR	Detailed information on the presentation of the vaccine as listed in the Health Canada DPD.	Single-dose vial with diluent (0.5ml in a prefilled-syringe). 1 & 10 kits

BC Vaccine Catalog Data Dictionary

Data Field	Description	Example
NUMBER OF AIS	Number of active ingredients in the product as listed in the Health Canada DPD.	5
NTP_NAME	A non-proprietary therapeutic product (NTP) immunizing agent name describes the unique combination of active substances (therapeutic moieties) and their strengths, form, intended route, and unit of presentation of a preparation.	Meningococcal polysaccharide antigen group a 5 MCG + Meningococcal polysaccharide antigen group c 5 MCG + Meningococcal polysaccharide antigen group w-135 5 MCG + Meningococcal polysaccharide antigen group y 5 MCG + Tetanus toxoid 44 MCG Intramuscular Kit AND Powder for solution
AVAILABILITY	Health Canada status of products approved for use in Canada (e.g., approved, marketed, cancelled post market, special access, international, and dormant).	Marketed
MARKET AUTHORIZATION HOLDER	Company Name of the market authorization holder for this vaccine product.	Pfizer Canada Ulc
DIA SCT CODE	SNOMED CT code for a MIP parent concept that categorizes the medicinal product details.	7121000087107
DIA SCT FORMAL NAME	Detailed categorization of the vaccine including valency, mechanism (e.g., live attenuated, inactivated) and qualitative strength (e.g., high dose, low dose) of the agent or agents contained in the vaccine.	Vaccine product containing only meningococcal groups A + C + Y + W-135 conjugate antigens (medicinal product)

BC Vaccine Catalog Data Dictionary

Data Field	Description	Example
DIA SHORT NAME	Detailed immunizing agent short name following existing conventions.	Meningococcal A+C+Y+W-135 conjúgate
DIA ABBREVIATION	Detailed immunizing agent abbreviation to be used as appropriate in orders or documenting immunizing agent history when specific manufactured immunizing product to be given or historically administered are not known.	Men A+C+Y+W-135 conj
IA SCT CODE	SNOMED CT code represents the type of immunizing agents (medicinal product).	921000221108
IA SCT FORMAL NAME	SNOMED CT name by immunizing agents of the disease for which they provide active or passive protection.	Vaccine product containing only Neisseria meningitidis antigen (medicinal product)
IA SHORT NAME	Immunizing agent succinct name.	Meningococcal
IA ABBREVIATION	Abbreviation for the immunizing agent	Men
WHO ATC CODE	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) code.	J07AH04
WHO ATC NAME	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) name of medicinal substances.	Meningococcus, a, c, y, w-135, tetraaval. purified polysacc. antigen
DISPLAY NAME	Immunizing agent abbreviation including brand name and market authorization holder abbreviation to be used when displaying a list of vaccines to clinicians.	Men-C-ACYW-135 NIMENRIX Pfiz
MIP LAST STATUS	Manufactured Immunizing Product status in BC subset (e.g., added, modified).	Added

BC Vaccine Catalog Data Dictionary

Data Field	Description	Example
MIP LAST STATUS DATE	Date of addition or modification of MIP.	2022-03-31
PRODUCT MONOGRAPH URL	URL for detailed information around the vaccine (e.g., indications, dose and administration, contradictions, warnings). For Health Canada DPD products, this is usually the product monograph. When product monograph is not available, the link may be to other authoritative sources such as WHO, US FDA, BC or US CDC.	https://pdf.hres.ca/dpd_pm/00062618.PDF
HEALTH CANADA -DPD-LINK	A hyperlink to the vaccine product monograph on Health Canada's website is available through the DIN hyperlink in the Tradename browsing table.	https://health-products.canada.ca/dpd-bdpp/info?lang=eng&code=88773

2. BC Vaccine Manufactured Immunizing Products (MIP)

Subset Name	BC Vaccine MIP
Tab	BC MIP
Description	Manufactured Immunizing Products (MIP) with parent Detailed Immunizing Agent (DIA) and selected denormalized metadata. This content includes brand specific vaccine products NOT available for prescribing and administration in Canada but can be used by clinicians to document vaccine histories of patients.

Field name	Description	Example
BC UNIQUE MIP CODE	Code used to uniquely identify the manufactured immunizing product.	2509210
BC UNIQUE MIP CODE SYSTEM	Code system associated with the unique identifier. Currently, only Health Canada drug products and SNOMED CT code systems are used.	Health Canada
HC DIN	Drug Identification Number issued by Health Canada that corresponds to the Manufactured Immunizing Product.	2509210
BC PIN (PHARMANET)	B.C internal unique Product Identification Number (PIN) used for publicly funded vaccine PharmaNet claims.	66128152

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
MIP PRODUCT NAME	Manufactured Immunizing Product name as listed by Health Canada.	COMIRNATY messenger ribonucleic acid 30 micrograms per 0.3 milliliter suspension for injection BioNTech Manufacturing GmbH (real clinical drug) - PURPLE CAP VIAL (12+ YEARS)
MIP SCT CODE	SNOMED CT code represents the manufactured product (real clinical drug).	28581000087106
MIP SCT FORMAL NAME	SNOMED CT fully specified name identifying the real clinical drug name of vaccines and passive immunizing agents with precise ingredients, strength, dose form and relevant unit of presentation.	COMIRNATY messenger ribonucleic acid 30 micrograms per 0.3 milliliter suspension for injection BioNTech Manufacturing GmbH (real clinical drug) - PURPLE CAP VIAL (12+ YEARS)
HC_FORM	Health Canada (HC) available physical forms in which the vaccine is produced and dispensed (e.g., tablet, capsule, liquid, suspension). Options listed in the DPD are concatenated and separated by commas.	Suspension

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
HC_ROUTE	Health Canada (HC) possible routes of administration for this vaccine. Options list in the DPD are concatenated and separated by commas.	Intramuscular
UNIT OF PRESENTATION CODE	SNOMED CT code representing the unit of presentation.	733020007
UNIT OF PRESENTATION NAME	The qualitative concept name that describes a countable entity in which the clinical drug is presented (e.g., tablet, capsule) or in which it is bounded (vial, ampule).	Syringe (unit of presentation)
DESCRIPTOR	Detailed information on the presentation of the vaccine as listed in the Health Canada DPD.	Orange cap vial
NUMBER OF AIS	Number of active ingredients in the product as listed in the Health Canada DPD.	4
NTP NAME	A non-proprietary therapeutic product (NTP) immunizing agent name describes the unique combination of active substances (therapeutic moieties) and their strengths, form, intended route, and unit of presentation of a preparation.	Famtozinameran (BA.4/BA.5) 5 MCG + Tozinameran (BA.4/BA.5) 5 MCG Intramuscular Suspension
DIA SCT CODE	SNOMED CT code for a parent concept that categorizes the immunizing vaccine agent (medicinal product) details.	1119349007
DIA SCT FORMAL NAME	Detailed categorization of the vaccine including valency, mechanism (e.g., live attenuated, inactivated) and qualitative strength (e.g., high dose, low dose) of the agent or agents contained in the vaccine.	Vaccine product containing only Severe acute respiratory syndrome coronavirus 2 messenger ribonucleic acid (medicinal product)

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
WHO ATC CODE	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) code.	J07BX03
WHO ATC NAME	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) name of medicinal substances.	Covid-19 vaccines
DISPLAY NAME	Immunizing agent abbreviation including brand name and market authorization holder abbreviation to be used when displaying a list of vaccines to clinicians.	COVID-19 COMIRNATY 30 mcg/0.3 ml 12+ mRNA PB (Purple cap/Purple label) DILUTE BEFORE USE
MARKET AUTHORIZATION HOLDER	Market authorization holder (MAH), also referred to as the manufacturer which holds the notice of compliance, the drug identification number, the medical device license number, the product license number or has received approval to initiate clinical trials in Canada.	Sanofi Pasteur Limited
AVAILABILITY	Health Canada status of products approved for use in Canada (e.g., approved, marketed, cancelled post market, special access, international, and dormant).	Marketed
MIP LAST STATUS	Manufactured Immunizing Product status in BC subset (e.g., added, modified).	Added
MIP LAST STATUS DATE	Date of addition or modification of MIP.	2022-12-15

3. BC Detailed Immunizing Agents (DIA)

Subset Name	BC Detailed Immunizing Agents (DIA)
Tab	BC DIA
Description	Detailed Immunizing Agents subset with parent immunizing agent (IA) and selected denormalized metadata. Detailed categorization of the vaccine including valency, mechanism (e.g., live attenuated, inactivated) and qualitative strength (e.g., high dose, low dose) of the agent or agents contained in the vaccine.

Field name	Description	Example
DIA SCT CODE	SNOMED CT code for a parent concept that categorizes the immunizing vaccine agent (medicinal product) details.	19401000087100
DIA SCT FORMAL NAME	SNOMED CT fully specified name for the concept	Vaccine product containing only Influenza virus 4 strains antigens (medicinal product)
DIA SHORT NAME	Detailed immunizing agent short name following existing conventions.	Influenza quadrivalent
DIA ABBREVIATION	Detailed immunizing agent abbreviation to be used as appropriate in orders or documenting immunizing agent history when specific manufactured immunizing product to be given or historically administered aren't known.	Inf quadrivalent
IA SCT CODE	SNOMED CT code representing the type of immunizing vaccine agents (medicinal product).	1181000221105

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
IA SCT FORMAL NAME	Groups immunizing agents by the disease for which they provide active or passive protection.	Vaccine product containing only Influenza virus antigen (medicinal product)
IA SHORT NAME	Immunizing agent name.	Influenza
IA ABBREVIATION	Abbreviation for the immunizing agent	Inf

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

4. BC Immunizing Agents (IA) Abbreviations

Subset Name	BC Immunizing Agents (IA) Abbreviations
Tab	BC IA
Description	Immunizing Agents (IAs). IAs group immunizing agents by the disease for which they provide active or passive protection

Field name	Description	Example
BC IA SCT CODE	SNOMED CT code representing the immunizing agent.	28531000087107
IA SCT FORMAL NAME	SNOMED CT fully specified name for the immunizing agent.	Vaccine product against severe acute respiratory syndrome coronavirus 2 (medicinal product)
IA SHORT NAME	Immunizing agent short name.	SARS-CoV-2
IA ABBREVIATION	Immunizing agent abbreviation	COVID-19

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

5. WHO ATC Codes

Subset Name	World Health Organization (WHO) ATC Code J07 Vaccines
Tab	WHO ATC Vaccine Codes
Description	Distinct WHO ATC concepts assigned to type Manufactured Immunizing Products (MIP)

Field name	Description	Example
WHO ATC CODE	ATC code J07 Vaccines is a therapeutic subgroup of the Anatomical Therapeutic Chemical (ATC) Classification System	J07BB03
WHO ATC NAME	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) name of medicinal substances for vaccines.	Influenza, live attenuated

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

6. Non-Health Canada MIP

Subset Name	Non-Health Canada Manufactured Immunization Product
Tab	Non-Health Canada MIP Product
Description	Non-Health Canada Manufactured Immunization Products not available in Canada and mapped to SNOMED CT codes for documenting immunizations for patient health records.

Field name	Description	Example
BC UNIQUE MIP CODE	Code used to uniquely identify the manufactured immunizing product.	2509210
BC UNIQUE MIP CODE SYSTEM	Code system associated with the unique identifier. Currently, only Health Canada drug products and SNOMED CT code systems are used.	Health Canada
MIP PRODUCT NAME	Manufactured Immunizing Product name as listed by Health Canada.	COMIRNATY messenger ribonucleic acid 30 micrograms per 0.3 milliliter suspension for injection BioNTech Manufacturing GmbH (real clinical drug) - PURPLE CAP VIAL (12+ YEARS)
MIP SCT CODE	SNOMED CT code that represents the manufactured product (real clinical drug).	28581000087106

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
MIP SCT FORMAL NAME	SNOMED CT fully specified name identifying the real clinical drug name of vaccines and passive immunizing agents with precise ingredients, strength, dose form and relevant unit of presentation.	COMIRNATY messenger ribonucleic acid 30 micrograms per 0.3 milliliter suspension for injection BioNTech Manufacturing GmbH (real clinical drug) - PURPLE CAP VIAL (12+ YEARS)
DIA SCT CODE	SNOMED CT code for a parent concept that categorizes the immunizing vaccine agent (medicinal product) details.	1119349007
DIA SCT FORMAL NAME	Detailed categorization of the vaccine including valency, mechanism (e.g., live attenuated, inactivated) and qualitative strength (e.g., high dose, low dose) of the agent or agents contained in the vaccine.	Vaccine product containing only Severe acute respiratory syndrome coronavirus 2 messenger ribonucleic acid (medicinal product)
WHO ATC CODE	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) code.	J07BX03
WHO ATC NAME	World Health Organization (WHO) Anatomical Therapeutic Chemical classification (ATC) name of medicinal substances.	Covid-19 vaccines
DISPLAY NAME	Immunizing agent abbreviation including brand name and market authorization holder abbreviation to be used when displaying a list of vaccines to clinicians.	COVID-19 COMIRNATY 30 mcg/0.3 ml 12+ mRNA PB (Purple cap/Purple label) DILUTE BEFORE USE

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
MARKET AUTHORIZATION HOLDER	Market authorization holder (MAH), also referred to as the manufacturer which holds the notice of compliance, the drug identification number, the medical device license number, the product license number or has received approval to initiate clinical trials in Canada.	Sanofi Pasteur Limited
AVAILABILITY	Health Canada status of products approved for use in Canada (e.g., approved, marketed, cancelled post market, special access, international, and dormant).	Marketed
MIP LAST STATUS	Manufactured Immunizing Product status in BC subset (e.g., added, modified).	Added
MIP LAST STATUS DATE	Date of addition or modification of MIP.	2022-12-15
PRODUCT MONOGRAPH URL	URL for detailed information around the vaccine (e.g., indications, dose and administration, contradictions, warnings). 7. National Vaccine Catalog (NVC) SNOMED CT Disease relationship

Subset Name	National Vaccine Catalog (NVC) SNOMED CT Disease relationship
Tab	NVCFromFHIR_Disease
Description	National Vaccine Catalog (NVC) SNOMED CT Disease table establishes the relationship between a vaccine or immunizing product parent concept and the disease(s) that the product is intended to prevent, mitigate, or provide passive protection against. The table supports a normalized, disease-centric model within the BC Vaccine Catalogue and serves as a key relationship layer between vaccine concepts and their clinical purpose.

Field name	Description	Example
SCT_Parent_code	Unique SNOMED CT identifier representing the vaccine parent concept, immunizing agent, biologic product class, or immunologic intervention.	1162643001
SCT_Parent_term	SNOMED CT Fully Specified Name (FSN) representing the vaccine parent concept.	Vaccine product containing only severe acute respiratory syndrome coronavirus 2 recombinant spike protein antigen (medicinal product)
SCT_Disease_code	SNOMED CT identifier representing the disease prevented, treated, or protected against by the parent concept.	840539006
SCT_Disease_term	Preferred SNOMED CT description of the disease associated with the vaccine parent concept (e.g., "Disease" being a parent of "Infectious disease").	COVID-19

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

8. National Vaccine Catalog (NVC) SNOMED CT to DIN relationship

Subset Name	National Vaccine Catalog (NVC) SNOMED CT DIN relationship
Tab	NVCFromFHIR_Din
Description	National Vaccine Catalog (NVC) SNOMED CT Manufactured Immunization Products mapped to Health Canada DIN

Field name	Description	Example
MIP SCT CODE	SNOMED CT code representing the manufactured product (real clinical drug).	6961000087102
MIP SCT FORMAL NAME	SNOMED CT fully specified name identifying the real clinical drug name of vaccines and passive immunizing agents with precise ingredients, strength, dose form and relevant unit of presentation.	Twinrix 360 ELISA units HAV and 10 micrograms HBV per 0.5 milliliter suspension for injection GlaxoSmithKline Inc. (real clinical drug)
HC DIN	Drug Identification Number issued by Health Canada that corresponds to the Manufactured Immunizing Product.	02237548

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

9. National Vaccine Catalog (NVC) SNOMED CT MIP relationship

Subset Name	National Vaccine Catalog (NVC) SNOMED CT MIP relationship
Tab	NVCFromFHIR_MIP
Description	National Vaccine Catalog (NVC) SNOMED CT MIP table provides a normalized representation of vaccine and immunization products at the Manufacturer Immunizing Product (MIP) level. It establishes a relationship between manufacturer-specific products, a standardized display name suitable for clinical workflows, the related parent SNOMED CT code, aligned to the associated Market Authorization Holder (MAH). The table supports vaccine inventory management, immunization documentation, interoperability, reporting, terminology services, and data normalization across multiple source systems.

Field name	Description	Example
MIP SCT CODE	SNOMED CT code represents the manufactured product (real clinical drug).	6961000087102
MIP SCT FORMAL NAME	SNOMED CT fully specified name identifying the real clinical drug name of vaccines and passive immunizing agents with precise ingredients, strength, dose form and relevant unit of presentation.	Twinrix 360 ELISA units HAV and 10 micrograms HBV per 0.5 milliliter suspension for injection GlaxoSmithKline Inc. real clinical drug)
DISPLAY NAME	Immunizing agent abbreviation including brand name and market authorization holder abbreviation to be used when displaying a list of vaccines to clinicians.	[HAHB] Twinrix Junior

BC Vaccine Catalog Data Dictionary

Field name	Description	Example
ABBREVIATION	Normalized short-form vaccine or immunization agent code representing the product family.	HAHB
MARKET AUTHORIZATION HOLDER CODE	Unique identifier representing the organization responsible for product market authorization in Canada.	27071000087101
MARKET AUTHORIZATION HOLDER DESCRIPTION	Name of the Market Authorization Holder (MAH) associated with the product.	GLAXOSMITHKLINE INC. (supplier)
SCT_PARENT_CODE	SNOMED CT parent code (or "supertype") is the numeric identifier represents a broader clinical concept directly above a more specific child concept (subtype) in the hierarchy, linked by an "is a" relationship.	9801000087100
SCT_PARENT_TERM	SNOMED CT is the human-readable description (usually the Fully Specified Name or Preferred Term) associated with the parent code.	Pediatric vaccine product containing only Hepatitis A + hepatitis B antigens low strength (medicinal product)
PASSIVE_AGENT_FLAG	Flag that distinguishes between active and passive immunization mechanisms.	FALSE
MIP STATUS	Manufactured Immunizing Product status in BC subset (e.g., added, modified).	active

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

10. National Vaccine Catalog (NVC) AglgAt Disease relationship

Subset Name	National Vaccine Catalog (NVC) AglgAt Disease relationship
Tab	NVCFromFHIR_AglgAt_Disease
Description	NVC_SCT_AglgAt_Disease table provides a normalized relationship between immunologically active components (e.g., antigen, antibody, anti-toxin, or mRNA content) and their corresponding target diseases. Each concept is mapped to one or more target diseases to support disease-based clinical workflows and public health reporting.

Field name	Description	Example
AglgAt_CODE	SNOMED CT code represents the Antigen, Immunoglobulin, and Antitoxin substance concept	717220006
AglgAt_TERM	SNOMED CT fully specified name identifying the Antigen, Immunoglobulin, and Antitoxin substance.	Vaccinia human immune globulin (substance)
AglgAt_DISPLAY	A normalized, clinically friendly display name assigned to the AglgAt concept used when displaying a list of immunizing agents to clinicians.	Vaccinia human immune globulin
AglgAt_CONCEPT_STATUS	Indicates whether the AglgAt concept is currently active or inactive within the terminology model.	active
DISEASE_CODE	SNOMED CT concept identifier representing the disease targeted by the AglgAt component.	67924001
DISEASE_TERM	Preferred SNOMED CT disease description associated with the AglgAt concept.	Smallpox

BC Vaccine Catalog Data Dictionary

[Return to Table of Contents](#)

11. National Vaccine Catalog (NVC) SCT_AglgAt relationship

Subset Name	National Vaccine Catalog (NVC) SCT_AglgAt relationship
Tab	NVCFromFHIR_AglgAt
Description	NVC_SCT_AglgAt table provides a relationship between the SNOMED CT parent concept and the corresponding Antigen substance used in the vaccine (medicinal product). Each concept is mapped to one or more Vaccine products to support disease-based clinical workflows and public health reporting.

Field name	Description	Example
Parent_code	SNOMED CT code concept identifier assigned to the antigen, antibody, immunoglobulin, anti-toxin, mRNA construct, viral vector, or vaccine-content concept associated with a vaccine or passive immunization product (e.g., Antigen, Immunoglobulin, Antitoxin).	717220006
Parent_term	SNOMED CT fully specified name identifying the Antigen, Immunoglobulin, Antibody, and Antitoxin substance.	Vaccinia human immune globulin (substance)
Antigen_code	A normalized, clinically friendly display name assigned to the AglgAt concept used when displaying a list of immunizing agents to clinicians.	Vaccinia human immune globulin
Antigen_term	Indicates whether the AglgAt concept is currently active or inactive within the terminology model.	active
