

## Test Review Committee Active Cases

### Test Name

AST testing

Blood film review

C. difficile toxin, real time PCR

Hepatitis B virus identification by nucleic acid amplification, direct quantification

BK polyoma virus identification by nucleic acid amplification, direct quantification

Cytomegalovirus Viral identification by nucleic acid amplification, direct quantification

Molecular identification, stool isolate

Trichomonas Antigen Test

Helicobacter pylori stool antigen

Anti-tissue transglutaminase antibodies, IgA

Neurology immuno markers

Neurology immune markers - sequencing for seizure disorders

Infliximab

Drugs of Abuse Testing

Newborn screening for severe combined immunodeficiency, biotinidase and carnitine uptake defect

Gastrointestinal pathogen multiplex panel and Selective Culture

Neonatal alloimmune thrombocytopenia

Hemolytic disease of the newborn

Comprehensive drug analysis
