

## Test Review Committee Active Cases

Test Review Committee (TRC) applications are considered active after the initial application is reviewed by the TRC Triage Team and until a Record of Decision is released by the Ministry of Health. This list includes only those tests that meet the above criteria.

*Input related to any test under review by the TRC may be submitted for consideration up to 20 business days after the date of posting. Submissions received after 20 business days may not be received in time for inclusion in the TRC review. Input will be accepted in writing to [testreview@bccss.org](mailto:testreview@bccss.org).*

Test Name	Request	Date of Posting
<b>Blood film review</b>	Review of blood film review test utilization and expenditure	September 12, 2016
<b>Anti-tissue transglutaminase antibodies (anti-TTG), IgA</b>	Review of provisional status	September 12, 2016
<b>Infliximab</b>	Addition of new clinical laboratory test	March 22, 2017
<b>Drugs of Abuse Testing</b>	Review of utilization and expenditure for fee items associated with drugs of abuse testing	September 12, 2016
<b>Newborn screening for severe combined immunodeficiency (SCID), biotinidase (BTN) and carnitine uptake defect (CUD)</b>	Addition of new clinical laboratory tests	September 12, 2016
<b>Comprehensive drug analysis (CDA)</b>	Addition of new clinical laboratory test	March 22, 2017
<b>Thiopurine metabolites</b>	Addition of new clinical laboratory test	September 7, 2017
<b>Anti-deamidated gliadin peptide antibodies</b>	Addition of new clinical laboratory test Removal of existing clinical laboratory test – IgA anti-gliadin antibodies	September 7, 2017
<b>Mismatch Repair Panel (MMR)</b>	Addition of new clinical laboratory test	September 7, 2017
<b>MLH1 Methylation testing</b>	Addition of new clinical laboratory test	September 7, 2017
<b>BRAF Immunohistochemistry</b>	Addition of new clinical laboratory test	September 7, 2017

<b><i>Pneumocystis jirovecii</i></b> <b>pneumonia PCR</b>	Addition of new clinical laboratory test	September 7, 2017
<b><i>Trichomonas</i> Nucleic Acid Amplification Test</b>	Addition of new clinical laboratory test Removal of existing MSP fee items – 90784 and 90785	October 23, 2017
<b>Telomere Length</b>	Addition of new clinical laboratory test	November 20, 2017
<b>Thiopurine methyltransferase (TPMT)</b>	Addition of new clinical laboratory test	November 20, 2017
<b>Updated: November 17, 2017</b>
