

Severe Weather

There are many types of severe weather phenomena – thunderstorms, hail, blizzards, ice storms, hurricanes, storm surges, tornadoes and heavy rain, to name a few. These events develop quickly and can pose serious risk to life and property. Did you know the lowest recorded temperature in B.C. was on Friday, January 31, 1947 in Smith River at a chilling -58.9°C !

Severe Weather | Worksheet
