

1.04 HEPATITIS B PREVENTION/POST EXPOSURE FOLLOW-UP

1.04.1 RELATED DOCUMENTS

- 1.10 Hepatitis B Prevention/Post Exposure Follow-up Policy

1.04.2 PROCEDURES

PREVENTION

- (1) Groups should discuss the merits of hepatitis vaccination with local health officials before commencing their immunization program and arranging for vaccine.
- (2) Obtain EMBC Task Number through your EMBC regional office.
- (3) Arrange for an appropriately qualified medical professional to administer shot(s).
- (4) Forward Expense Reimbursement Request, together with invoice and Task Registration Form, to applicable Regional Manager for approval and submission to EMBC Headquarters for payment/reimbursement.

POST EXPOSURE

- (1) Volunteer must be advised to seek medical attention immediately after direct contact with body fluids.
- (2) When a volunteer has been exposed to body fluids, the Task Report must reflect the specific exposures details and identify the volunteer specifically by name.
- (3) WorkSafeBC forms are NOT required to be completed for exposure to body fluids.
