# WILDFIRE SAFETY INFORMATION FOR MEDIA

For Immediate Release  
July 21, 2020

Ministry of Forests, Lands, Natural Resource Operations  
and Rural Development  
BC Wildfire Service

## Updated media protocols in response to COVID-19

KAMLOOPS – The British Columbia government is committed to keeping the public informed about wildfire activity in the province.

In response to the ongoing pandemic, the BC Wildfire Service has implemented new media protocols to reduce and mitigate the risks of COVID-19 for our media partners and our staff. Until further notice the BC Wildfire Service is not able to accommodate face-to-face interviews. Staff will be available for Interviews by phone, Skype or other online tools.

Additionally, we are unable to provide helicopter flights to members of the media because revised aviation protocols are in place. Other requests, such as visits to fire camps, may also be declined depending on the situation and health guidelines that are in place.

For the safety and health of fireline workers, any member of the media who wishes to visit the scene of a fire must request permission to do so. Where possible, the BC Wildfire Service will provide opportunities for its media partners to visit the scene of a wildfire when it is safe to do so.

The BC Wildfire Service will continue to work with its media partners to provide accurate and timely information about active wildfires during the 2020 wildfire season.

**Note:** Given the unpredictable nature of wildfires and wildfire behaviour, the final decision on providing access to a wildfire rests with the wildfire's incident commander, and initial permission to visit a wildfire may be revoked in the interest of safety. If a media representative enters a wildfire site without permission, it not only jeopardizes that person's safety, but also the safety of firefighting crews. Such conduct may even force a halt to fire response operations (including air support) until that person is removed from the site.

Please respect the BC Wildfire Service's decisions regarding access to a wildfire, since entering the fire site without permission can directly affect firefighters' ability to contain a fire.

**To request permission, please contact an information officer prior to visiting any BC Wildfire Service office, fire camp or worksite.** This includes all sites where firefighting crews are actively working or where firefighting equipment is being staged. Whenever possible, information officers will provide relevant photos and videos to media and to the public through social media and the BC Wildfire Service website. Information officers are available at B.C.'s six regional fire centres, as well as at the provincial wildfire coordination centre.

**Coastal Fire Centre:** 250 951-4209; [BCWS.COFCInformationOfficer@gov.bc.ca](mailto:BCWS.COFCInformationOfficer@gov.bc.ca)

**Cariboo Fire Centre:** 778 799-2100; [BCWS.CAFCInformationOfficer@gov.bc.ca](mailto:BCWS.CAFCInformationOfficer@gov.bc.ca)

**Prince George Fire Centre:** 250 561-4629; [BCWS.PGFCInformationOfficer@gov.bc.ca](mailto:BCWS.PGFCInformationOfficer@gov.bc.ca)

**Kamloops Fire Centre:** 250 554-5965; [BCWS.KFCInformationOfficer@gov.bc.ca](mailto:BCWS.KFCInformationOfficer@gov.bc.ca)

**Southeast Fire Centre:** 250 365-4014; [BCWS.SEFCInformationOfficer@gov.bc.ca](mailto:BCWS.SEFCInformationOfficer@gov.bc.ca)

**Northwest Fire Centre:** 250 847-6639; [BCWS.NWFCInformationOfficer@gov.bc.ca](mailto:BCWS.NWFCInformationOfficer@gov.bc.ca)

1. **In order to be escorted around a fire site, members of the media must wear appropriate clothing and a removeable non-medical mask or face covering large enough to cover their mouth and nose.** Appropriate clothing includes a hard hat and clothing that fully covers the arms and legs. Avoid highly flammable synthetic fabrics, such as nylon and polyester. Tightly woven clothes made from natural fibres are recommended. A high-visibility vest and eye protection may be required. Footwear suitable for rough terrain is essential.
2. **A BC Wildfire Service representative will be assigned to the media representative and safety rules will be discussed.** Stay with this designated representative at all times at the worksite. Follow his or her instructions.

To ensure media compliance with health and safety regulations, the BC Wildfire Service requires them to adhere to the rules listed below:

### **General**

- The media outlet's appointed supervisor has the authority and responsibility to correct any unsafe activity.
- The incident commander has the authority to restrict or limit access to a site.
- A BC Wildfire Service representative will provide relevant safety information and will communicate and review site hazards for media staff at the fire site.
- If this representative's instructions are disregarded, the incident commander may require the violator(s) to leave the site.
- Continual safety violators may be reported to WorkSafeBC or Labour Canada for further follow up.

### **Aircraft operations**

- All wildfires are automatically considered to be "flight restricted", according to Canadian Aviation Regulations. The restricted area includes a radius of five nautical miles around a fire to an altitude of 3,000 feet above ground level.

- The operation of any aircraft not associated with fire suppression activities within this area, including drones and helicopters, is illegal.
- It should not be assumed that it is clear to enter the airspace outside of this area. It is illegal to enter restricted airspace without prior approval from the BC Wildfire Service's regional wildfire coordination officer (RWCO).
- If a media outlet wants to request air access to a restricted area, it must contact a fire information officer. The request will be forwarded to the RWCO. Access may be granted if conditions are appropriate and it is safe to do so. If there is a Notice to Airmen (NOTAM) in place for the wildfire, the pilot must check the NOTAM for any other specific restrictions.
- The operation of unmanned aerial vehicles (UAVs, or "drones") near an active wildfire is illegal and extremely dangerous, especially when low-flying firefighting aircraft are present.
- Transport Canada and the BC Wildfire Service explicitly prohibit the use of drones of any size near a wildfire. Violating these rules can jeopardize the lives of aircrews and those on the ground, and inhibit fire suppression activities. For safety reasons, if a drone is detected in the restricted airspace over a wildfire, the BC Wildfire Service will ground any of its aircraft that are nearby until the drone has left the area.
- More information about drone safety is available on the Transport Canada website: <https://www.tc.gc.ca/en/services/aviation/drone-safety.html>

#### **Stay alert:**

- Know the escape routes. Ask if unsure or if there are any other concerns.
- Watch out for rolling debris that may be dislodged by fire suppression activity.
- Stay away from windfalls, weakened trees, loose rocks and hot spots.
- Ride only in standard vehicles, not heavy machinery. Always wear a seatbelt.
- Use caution around machinery and only approach when in full view of the operator.
- Stay at least two tree lengths away from tree-falling activities.
- Stay clear of airtanker drop areas and helicopter landing areas.
- Have plenty of water on hand to prevent dehydration.
- Any injury must be reported and treated.

For any questions about safety responsibilities as an employer, media outlets can contact the following organizations:

#### **For print media outlets:**

WorkSafeBC - Prevention Division  
 604 276-3100 in the Lower Mainland  
 1 888 621-7233 toll-free within B.C.
