

2020 BCWS EQUIPMENT RATES and MARKET FUEL ADJUSTMENTS

What's New for 2020

- Rates are calculated by adding the Base Rate to the Market Fuel Adjustment. Example: Section 1.2 Class 3 2019 Buncher in March 2020 has a base hourly rate of \$190.41 plus \$42.90 (March Market Fuel Adjustment) for total rate of \$233.31. Operator Rate is included in Base Rate.
- Additional reference models provided with current model year models only used.
- Reference data sources increased and updated for 2020.
- Fixed costs have seen decreases in financing cost and increases in insurance costs. Some machines have price decreases while others have price increases.
- Variable costs have seen decreases in fuel cost and certain payroll burden. Some machine type wage costs have been adjusted upwards or downwards according to increased reference data.
