

# Colonial land management systems: Barriers to First Nation community wildfire mitigation in interior British Columbia

Georgina Preston, Dr. Greg Greene, & Dr. Lori Daniels  
University of British Columbia

THE UNIVERSITY OF BRITISH COLUMBIA  
Community Engagement

BCWS Meetings  
February 28, 2023

# Overview

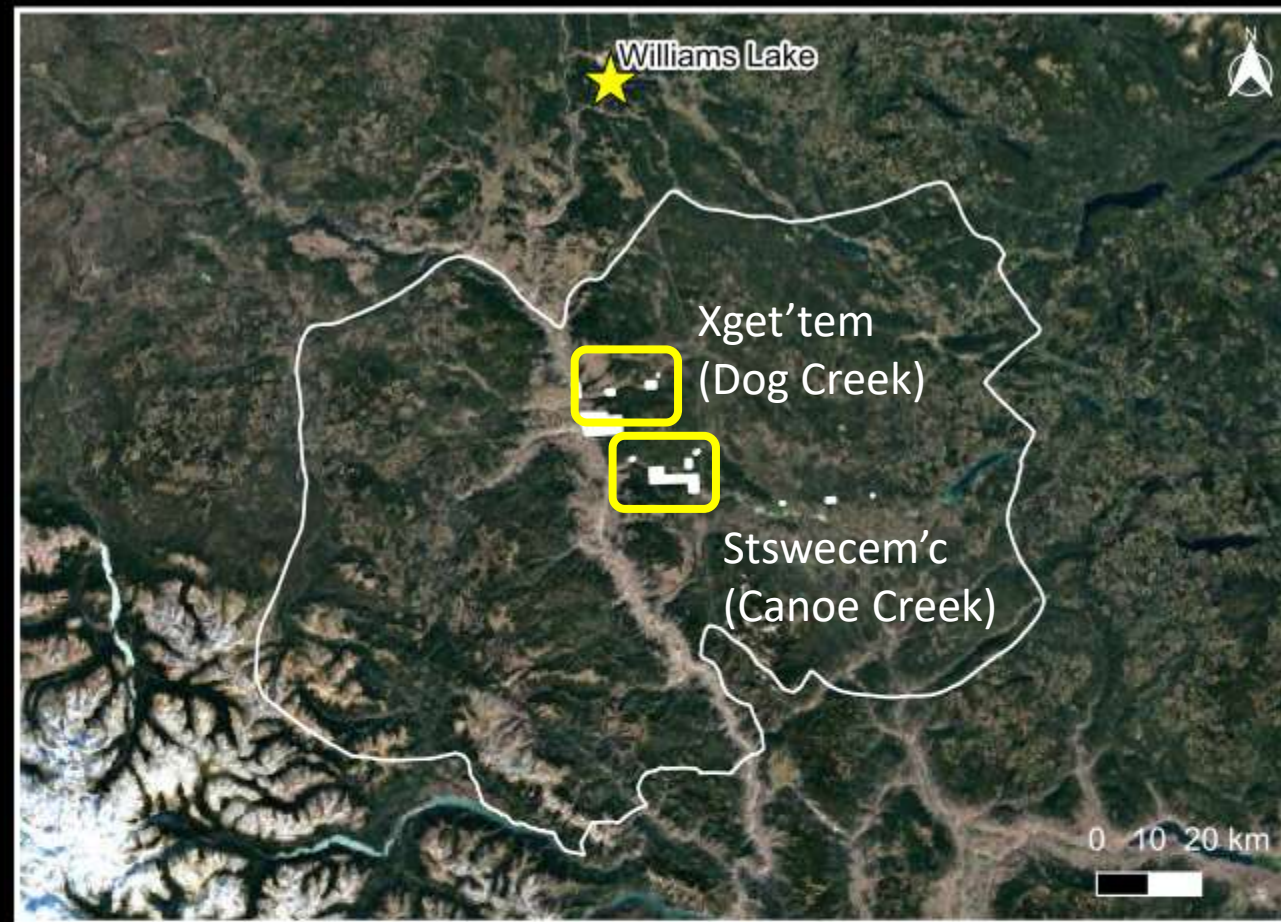

---

- Stswecem'c Xget'tem First Nation
- Our Research Partnership
- Results and Applications
- Addressing Risk: Barriers and Opportunities

# Stswecem'c Xget'tem First Nation (SXFN)

- Secwépemc Nation
- Two Communities
  - Stswecem'c (Canoe Creek)
  - Xget'tem (Dog Creek)
- Since time immemorial
- Pursuing modern-day Treaty with B.C. and Canada
- Government-Government Agreements with B.C.

## SXFN Traditional Territory

- SXFN Territory
- SXFN Reserves

Google Satellite

# Wildfire Risk Surrounding SXFN Communities

**Stswecem'c (Canoe Creek)**

**Xget'tem (Dog Creek)**

# Historical Forest Conditions

---

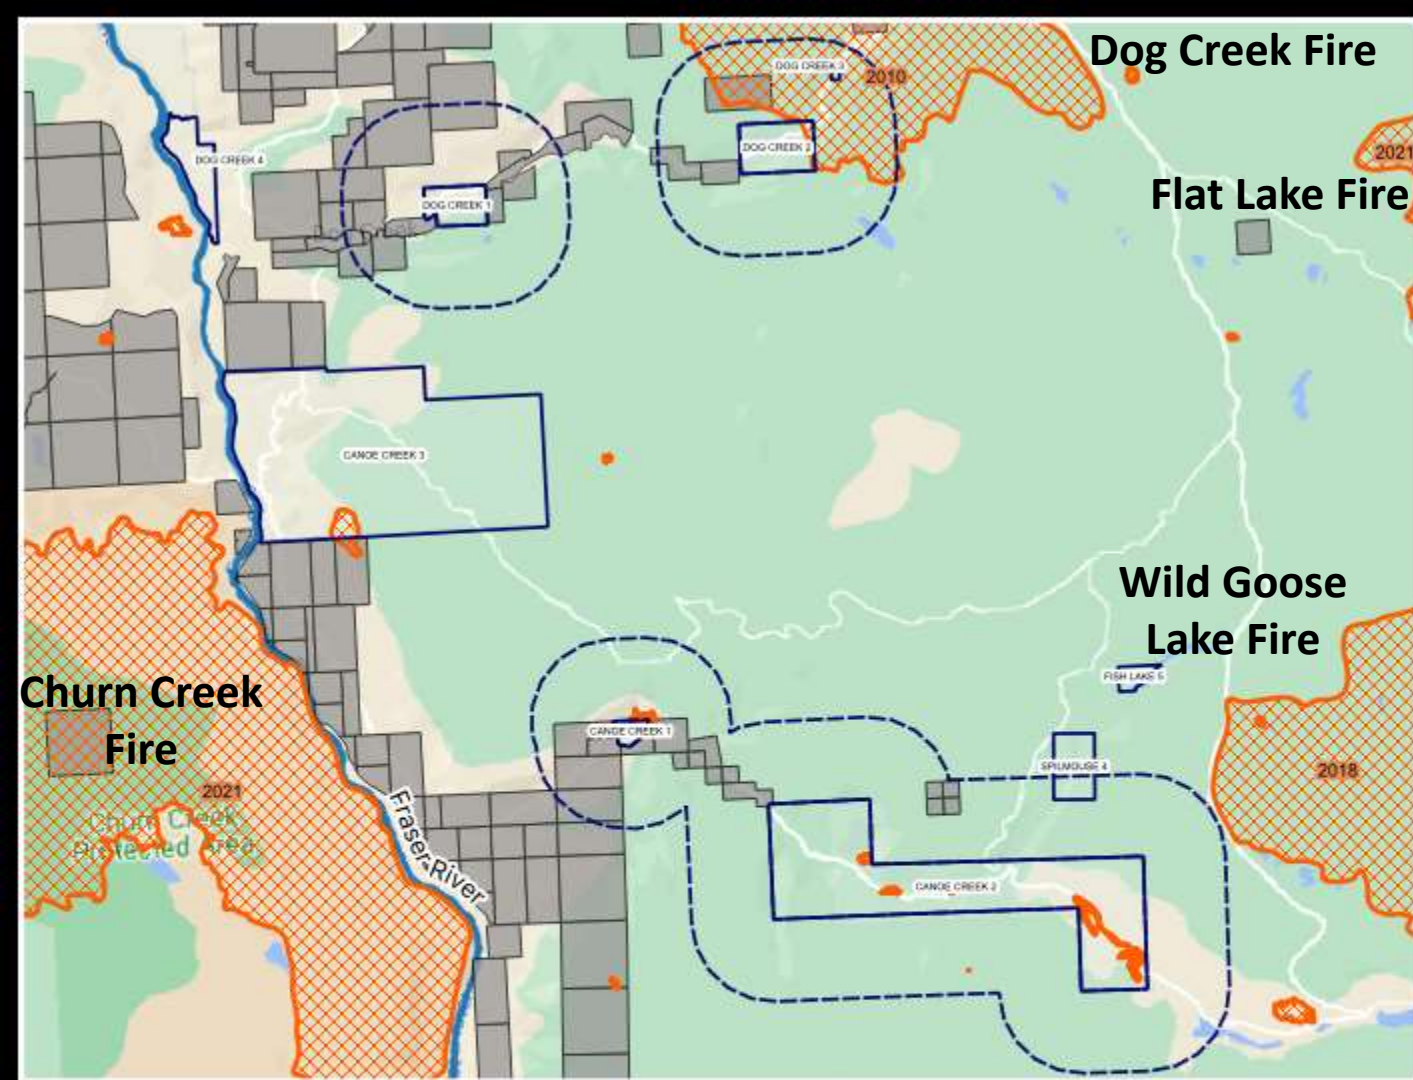

- Open, uneven aged Douglas-fir forests
- Maintained by frequent, low intensity fires
- Oral histories, fire scars and tree rings [2,3] indicate cultural burning

Current forest policy does not promote SXFN values

# Fire in SXFN Territory

- 2009
  - Kelly Creek Fire (20,925 Ha)
- 2010
  - Dog Creek Fire (7,495 Ha)
- 2017
  - Gustafson Fire (5,700 Ha)
  - Elephant Hill Fire (191,865 Ha)
  - Hanceville Fire (241,160 Ha)
- 2018
  - Wild Goose Lake Fire (6,481 Ha)
- 2021
  - Churn Creek Fire (12,040 Ha)
  - Flat Lake Fire (73,862 Ha)
  - McKay Creek Fire (44,964 Ha)

Stswecem'c Xget'tem Wildfire Risk Study Area

- SXFN Reserves
- Study Area (2km radius)
- Private Land
- Recent Fire
- 2001 - 2021

Google Road

0 2.5 5 km

# Our research partnership

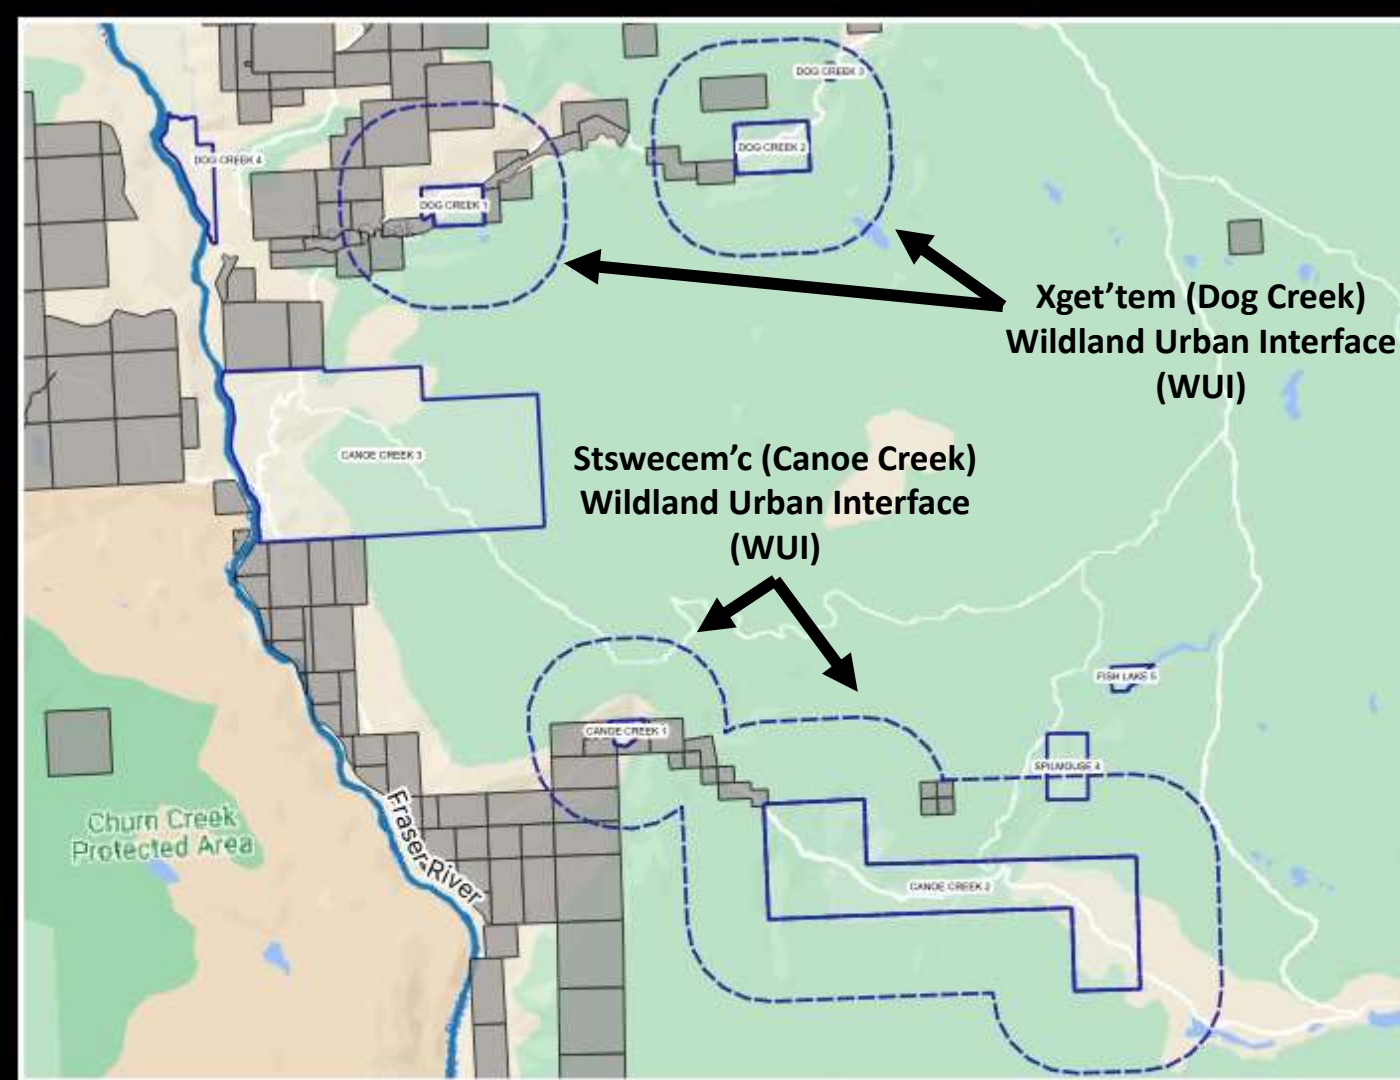

---

- Indigenous Collaborative Research Protocol Agreement
  - UNDRIP and OCAP
- SXFN Representative on Research Committee
- SXFN Youth Field Assistant 2022
- Community Engagement
  - Meetings with SXFN Leadership and Stewardship Department employees
  - Days on the land with SXFN staff and community members 2021 & 2022
  - Future 2023 Winter Community Engagement meeting

# Research Questions

1. How do fuel loads in colonially managed forests within SXFN's WUI contribute to likelihood of crown fire?
2. What colonial policies constrain SXFN's ability to reduce fuels and the likelihood of crown fire in the WUI?

Stswecem'c Xget'tem Wildfire Risk Study Area

Surface Fire

Passive Crown Fire

Active Crown Fire

# Not If, When: Preparing Stswecem'c Xget'tem First Nation for Wildfire

Easier to Implement Adaptations

## Strategic Planning

- Evacuation Plan
- Community Wildfire Resilience Plan (CWRP)
- BC government approvals for fuel treatments in the Wildland Urban Interfaces (WUI) "Crown" land

## Human & Physical Capital

- Full-time Emergency Coordinator
- Additional firefighting equipment & training
- Small-scale harvesting equipment & operator training
- Improved road conditions

## Forest Management

- Landscape level fuel breaks
- Fuel reduction treatments and planting of fire resilient species in the WUI
- Reintroduction of widespread controlled surface fire & integration of traditional values/knowledge

## Governance

- Government-to-Government partnership on emergency response & recovery
- Community Forest License that takes in both communities
- "Crown land" restitution
- Treaty

Harder to Implement Adaptations

# Barriers to Fuel Reduction

- 19/42 plots not meeting colonial criteria for fuel treatments
- 11/19 plots predicted active crown fire

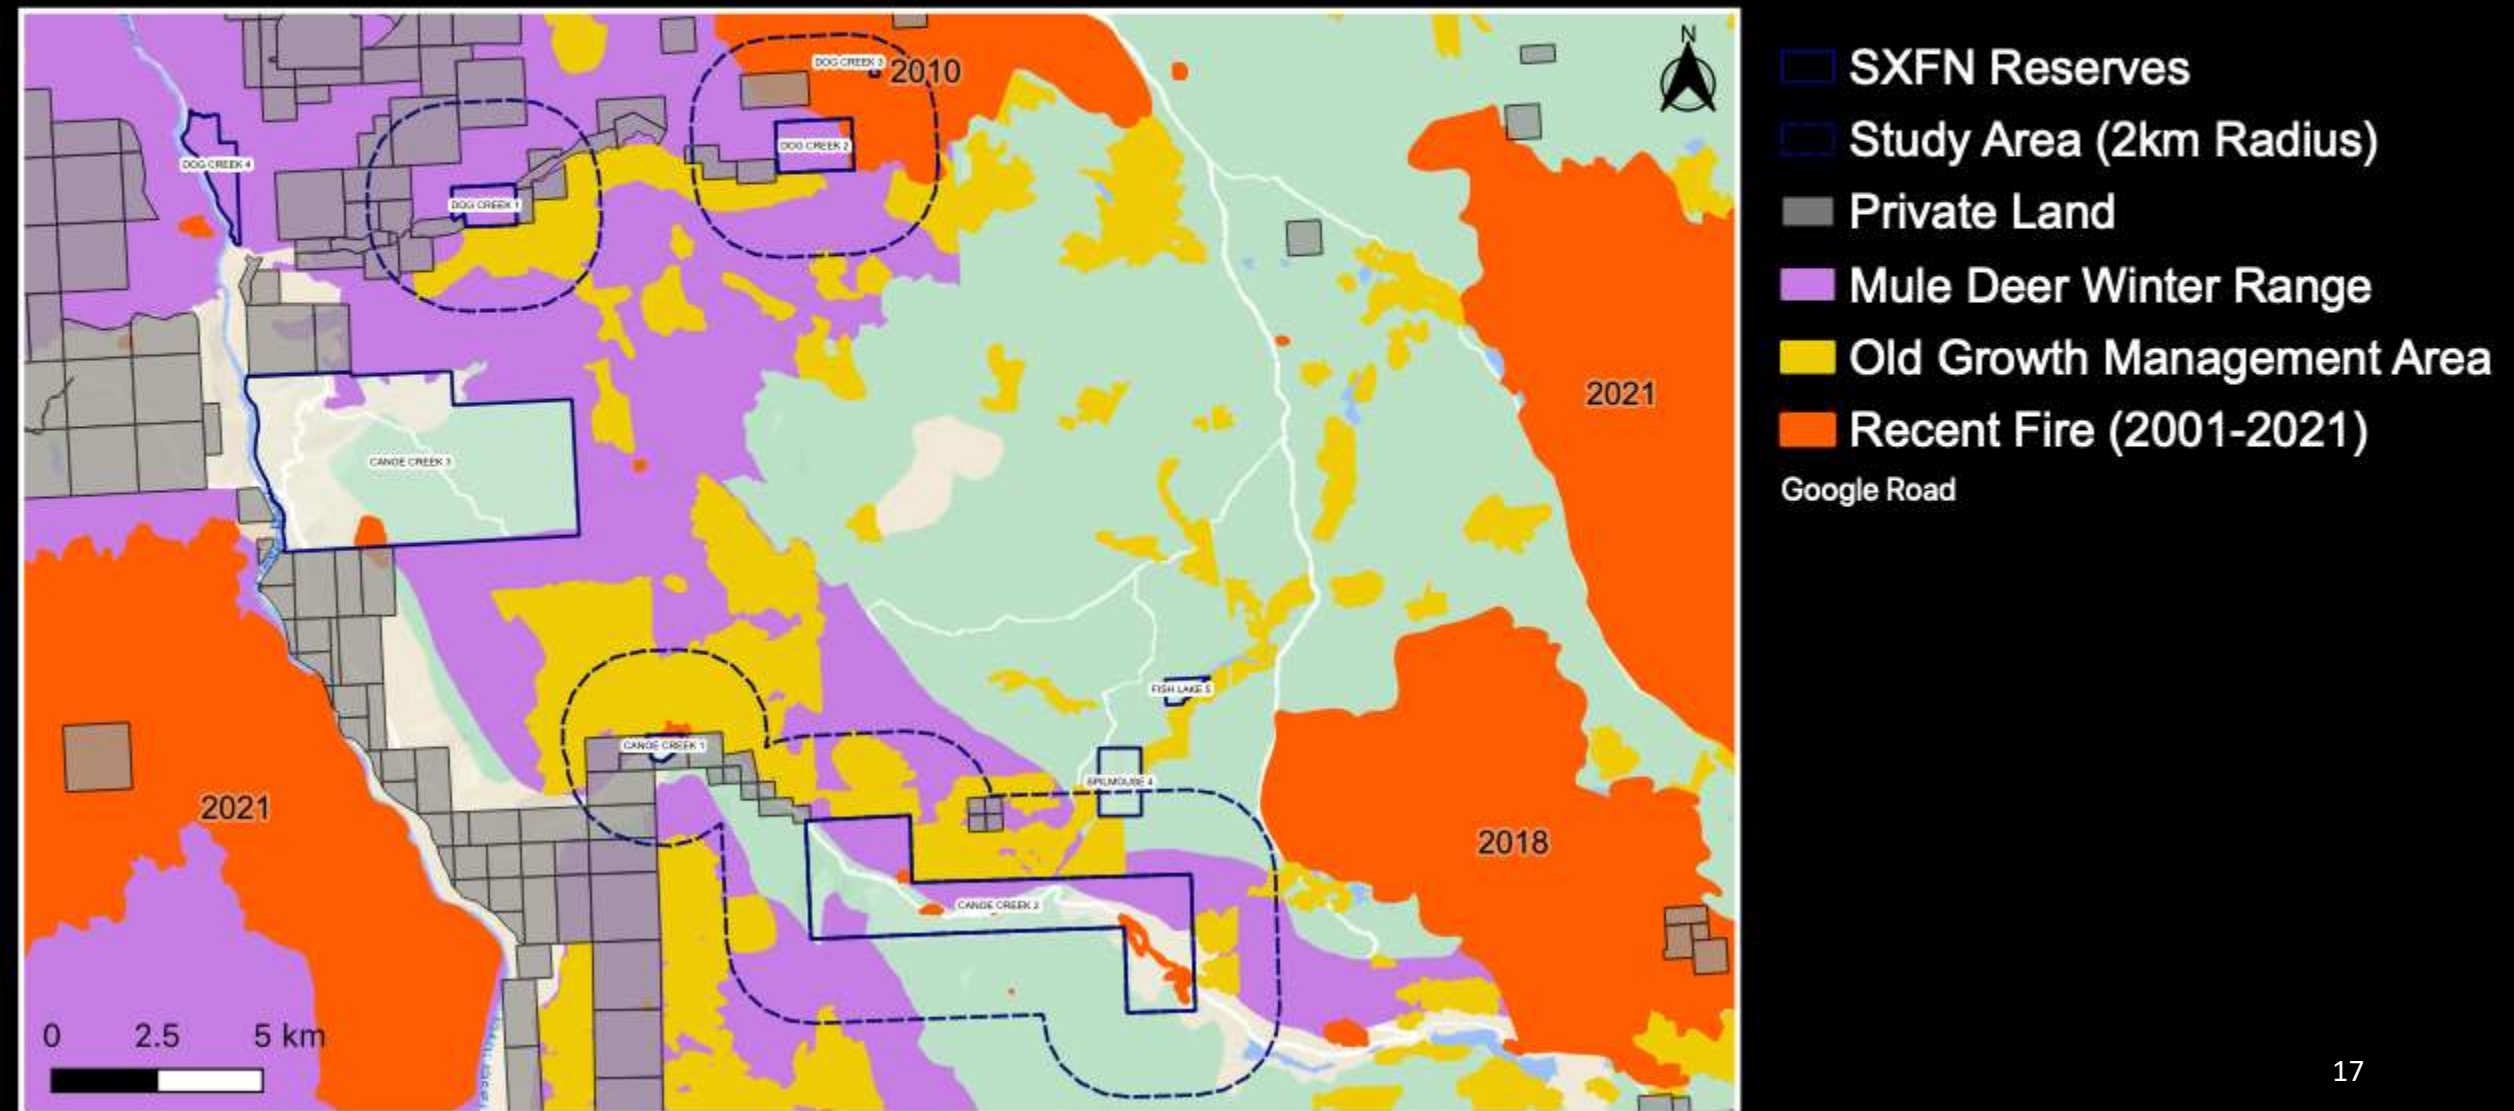

**Stswecem'c Xget'tem Traditional Territory**

# Colonial conservation areas likely to experience crown fire without active forest stewardship

# Addressing Risk: Barriers and Opportunities

---

## Barriers

- Complex colonial management regulations
- Economic constraints
  - Distance to market
  - Bad road conditions
  - High stumpage
  - Competition for funding
- Lack of SXFN forest tenure

## Opportunities

- SXFN fuel treatment process road map
- Increasing affordability
  - Local use of biomass
  - Better market for small trees
  - Reduced stumpage for WUIs
  - More funding
- SXFN forest tenure

# Addressing Risk: Barriers and Opportunities

---

Or most importantly,

#LandBack

**Fuel treatment process must become  
faster, easier, and more affordable**

# Thank you

---
