

What's New: Wildland Urban Interface Wildfire Risk Reduction Plans 2024

Wildland Urban Interface Wildfire Risk Reduction Plans (herein referred to as **WRR Plans**) are the new iteration of **Tactical Plans**. The name change better reflects the purpose of these plans and eliminates confusion with operational response plans.

What's new in the Guide and Standard:

- Edits to the WRR Plan Outcome and 'What is a WRR Plan?'
- Addition of visual to clarify differences between WUI WRR Plan and CWRP
- Updates to section 3.1 Data Inventory and information Collection to provide clarity on
 - Factors to consider when compiling data.
 - Values at risk
- Updates to Section 3.2 Data Analysis and Field Verification to provide clarity on:
 - Expectations around field data collection and PSTA validation
- Updates to Section 3.3 Planning and Fuel Management Units to provide clarity on:
 - The purpose of WRRUs and total chance planning
 - Anchoring WRRUs
 - WRRU continuity
 - The purpose of FTUs and AMUs
- Updates to the graphic example of a WUI WRR Plan
- Updates to Section 4.1 The WRR Plan Report
- Clarity on where spatial deliverables are to be sent

New Resource:

- A **WUI WRR Plan Report Template** is now available
