Daily & Annual Quotas for Salmon

Please refer to the NOTICE on $\underline{page\ 77}$ for Salmon Regulations.

Cutthroat Trout Reward Tagging Program

Comox Lake, Cowichan Lake, Horne Lake and Oyster River: \$100 reward tags are being used to assess the cutthroat trout fishery. Refer to page 76 for instructions on what to do if you catch a fish with a reward tag.

INVASIVE SPECIES ALERT

Atlantic Salmon

Please refer to the salmon section, page 78

MERCURY ADVISORY Mercury levels

in larger Smallmouth Bass in lakes on Vancouver Island and the Gulf Islands may be above national guidelines. Mercury levels tend to increase with the size of the fish and larger Smallmouth Bass generally have higher levels of mercury. The general public, especially children and women of child bearing age, including pregnant and breastfeeding women, are recommended to limit their consumption of Smallmouth Bass. More information on mercury in fish and fish consumption can be found in the HealthLinkBC Food Safety: Mercury in Fish at www.healthlinkbc.ca/sites/default/files/documents/healthfiles/hfile68m.pdf.

It is advised to regularly check the online Freshwater Fishing Regulation Synopsis for more up-to-date information at www.gov.bc.ca/FishingRegulations.

Wild Trout Release All streams regulation

Anglers note there is a region wide regulation (excluding Haida Gwaii) requiring the release of all wild origin trout in streams. This regulation allows only hatchery origin trout in streams to be harvested. In Region 1, hatchery origin trout from streams can be distinguished from wild origin trout by the presence of a healed scar in place of the adipose fin. Please note, this regulation does not apply to lakes. For more information please contact regional fisheries staff at (250) 751-7220.
