

Training Tax Credits: Table of Eligible Programs and Completion Requirements for Apprentices

Income Tax Act

To be eligible for the training tax credit (TTC), the apprentice **must** be registered with the Industry Training Authority in an eligible training program. If the apprentice is not registered with the Industry Training Authority, they will not be eligible for the training tax credit.

The table below shows the completion requirements for each tax credit level of an eligible program for the TTC. The table includes the BC (non-Red Seal) programs and the interprovincial (Red Seal) programs.

Some of the programs listed below may not currently be active with the Industry Training Authority. To determine the status of a program, check with the Industry Training Authority at itabc.ca

Note: For complete program information, please visit the [Training Tax Credit](#) website.

Notes

1. An * beside the name of a program means that it is an interprovincial (Red Seal) program. BC does not provide a TTC for levels 1 and 2 of these programs. A federal grant is provided by the federal government for completion of these levels.

For example, if you are registered in the Industrial Mechanic program, TTCs are available for levels 3 and 4 (graduate program). You must apply to the federal government for the federal grant for the completion of levels 1 and 2.

2. N/A means that there is no TTC available for the level shown.
3. Two ** beside N/A means that you may be eligible for the federal Apprenticeship Incentive Grant. Graduating from a Red Seal program may also entitle you to a federal Apprenticeship Completion Grant.
4. "Complete level 'x'" means complete the technical training for that level. For example, "complete level 3" means complete level 3 of technical training for that program.

5. "Graduate program" means that you must receive your Certificate of Qualification or Certificate of Apprenticeship to qualify for the level.
6. If you are enquiring about programs taken in 2015 or earlier, call us at 1 877 387-3332.
