

Gas Cost Allowance Reporting Procedures

Petroleum and Natural Gas Act

This information letter provides specific information for operators on the reporting procedures for filing **BC-23 Gas Cost Allowance** applications for producer-owned gas plants and producer-owned sales lines. Producer-owned sales lines include both marketable gas and natural gas liquid sales lines.

These reporting procedures are effective for the **2015 actual and 2016 estimated** BC-23 applications that are due on or before March 15, 2016.

Reporting Procedure

Operators of producer-owned gas plants who have one or more producer-owned sales lines used in the transportation of marketable gas and natural gas liquids are required to submit **separate** BC-23 applications. This means you submit one BC-23 for the producer-owned gas plant and a separate BC-23 for the producer-owned sales lines.

This reporting procedure is required because producer-owned sales lines often transport marketable gas or natural gas liquid volumes from sources other than the producing gas plant.
