

# HIGHWAY 1 INFORMATION & UPDATES

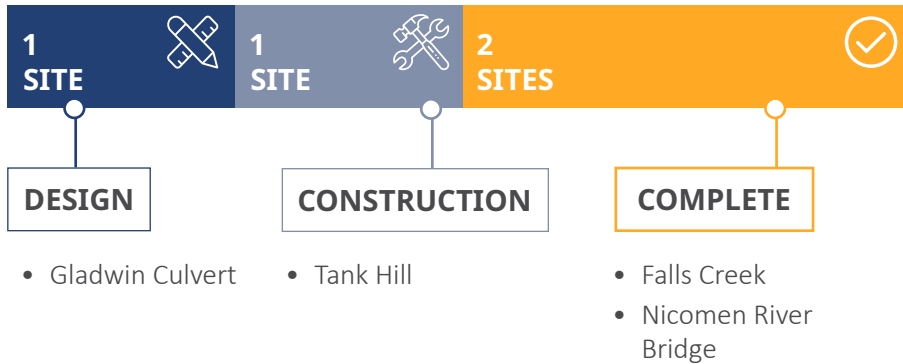

Ministry of  
Transportation  
and Transit

Infrastructure Update Prepared for Residents | June 2025

## PERMANENT REPAIR UPDATE

Permanent repairs are underway on Highway 1 to return the highway to full capacity. Construction is in progress for the Tank Hill project and design work is being completed for the Gladwin Culvert and Nicomen Community Bridge.

### Progress Overview

## TRAFFIC IMPACTS

The detour route at Tank Hill, 14 km east of Lytton, is open with two lanes of traffic through site.

There will be intermittent closures and single lane alternating traffic as required to allow for construction. Drivers may experience delays of up to 40 minutes at the site due to train traffic and construction activities.

The project team continuously monitors traffic flow and updates traffic control plans based on feedback from community members and drivers and in collaboration with CPKC rail.

Before travelling, check [DriveBC.ca](https://drivebc.ca) for up-to-date information on delays and road conditions.

and Transit

### Visit DriveBC

Construction may create travel delays throughout the corridor. Check [DriveBC.ca](https://drivebc.ca) for more detailed information about current road conditions and reduced speed zones.

### TANK HILL

#### Project Overview

The Tank Hill project is located 14 km east of Lytton

**Status:** In construction, on schedule for substantial completion by November 2025.

#### Updates:

Work on the overpass that will separate the highway and rail traffic is progressing quickly. In May, work included:

- Completing the installation of plate girders, which are steel beams used to support heavy loads.
- Installation of the concrete deck panels which support the concrete deck.
- Installing the west retaining walls that support the roadway approaching the new bridge.

Plate girders installed at Tank Hill

### GLADWIN CULVERT

#### Project Overview

The Gladwin Culvert project is located 10 km east of Lytton

**Status:** In design phase

#### Updates:

The detailed design for replacing the Gladwin Creek Culvert is complete. The project has gone to tender for a four-week tender period.

### NICOMEN COMMUNITY BRIDGE

The Ministry of Forests is taking over the Nicomen Community Bridge project from the Ministry of Transportation and Transit. As of July 2025, the Ministry of Forests will be responsible for maintenance of the existing Nicomen River road and bridge. The Ministry of Forests will also lead the construction and maintenance of a new bridge in the future.

Updates about this project will no longer be shared in this newsletter. For questions or updates on the Nicomen Community Bridge, please contact:
