## CONSTRUCTION STARTING SOON

Design work for the permanent repairs on the first section of damaged sites (sites 1 to 8) is complete. Construction on these sites will begin in the summer and is expected to be complete by fall 2024. The permanent repairs will improve safe access for residents and are designed to withstand future weather-related events. Be prepared for potential traffic delays throughout the summer.

Work on the sites 20 to 22 in the western end of the corridor near Spences Bridge will start in late 2024.
