

The Fraser Valley Highway 1 Corridor Improvement Program is improving safety, reliability and capacity between 216th Street in Langley through to Chilliwack. Widening and other highway improvements will meet the needs of a growing region, improve travel and transit services for people in the Fraser Valley and facilitate efficient goods movement.

Why It's Needed

The improvements are helping to meet needs in four key areas:

- Congestion: Improving travel times and reliability in both directions.
- Economic development: Supporting efficient goods movement.
- Population growth: Adapting to the growing number of people living and travelling in the region.
- Safety: Reducing the number and severity of crashes on the corridor.

Program Opportunities

- Improved transit services.
- More choices for active transportation (walking, biking rolling).
- Improved climate resiliency.
- Supporting Transit Oriented Development – the creation of complete, liveable and sustainable communities by building more homes near transit and services.
- Affordable housing.

Program Timeline

202nd Street to 216th Street

Completed in 2020.

216th Street to 264th Street

Under construction, with highway widening completion anticipated in 2026.

264th Street to Mt. Lehman Road

Under construction, with full completion anticipated in 2029.

Mt. Lehman Road to Highway 11

Under construction, with full completion anticipated in 2031.

Highway 11 through the Sumas Prairie

Integrated Planning Study in progress.
